EXOSKELETON PERCKO

MAKING EVERY LOAD LIGHTER

A TESTED AND VALIDATED PRODUCT

The exoskeleton has undergone rigorous testing by the Cogitobio research laboratory. These tests confirmed its effectiveness in reducing muscle and joint stress during load carrying.

40%

reduction in fatigue
in the back muscles

Spinal protection through
preservation of the natural
curvature

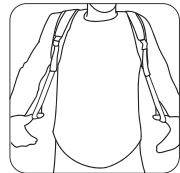

EASY TO USE

1. Start by putting on the
straps like a backpack

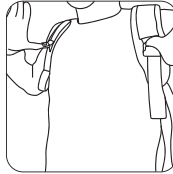

2. Fasten straps No. 1 around
your thighs, then tighten them

3. Adjust the shoulder straps
by pulling on straps No. 2.

4. Activate the exoskeleton by
pulling on strap No. 3.

5. Deactivate the device by
unclipping the fasteners.

A SYNERGY OF PERCKO PRODUCTS

The **PERCKO exoskeleton**, designed to assist you when carrying loads, perfectly **complements the Lyne PRO**, the vest that promotes good postural habits. These two innovations are designed to work together in harmony, providing maximum optimization:

- **LYNE PRO** guides your posture and encourages proper posture.
- **The exoskeleton** reduces the load on your muscles and joints.

This unique combination ensures daily comfort, safety, and performance while minimizing the risk of musculoskeletal disorders.

A UNIQUE AND ACCESSIBLE PRODUCT

- **One-size-fits-all and unisex** adapting to all body types.
- **Lightweight equipment:** only 700 g.
- **Attractive price:** €499 excl. VAT per unit.
- **Tailored support:** benefit from the guidance of our field teams for optimal integration and use of your exoskeleton.
